

## Tinkerine Cloud introduces Advanced Menu, and custom 3D Printer Profiles

**June 15, 2021 - Tinkerine™ Studios Ltd. (TSXV: TTD)** ("Tinkerine" or the "Company") announces the introduction of advanced menu and custom 3D printer profiles for Tinkerine Cloud.

The latest expansion of Tinkerine Cloud to include use by 3D 3<sup>rd</sup> party hardware is at the core of our user expansion plan with Cloud services. Custom profiles and advanced menus create an opportunity for other hardware manufacturers to integrate and use Tinkerine Cloud to fine tune and operate their machines.

### Tinkerine Cloud Advanced Menu and Custom Printer Profile

The customizability of 3D printing profiles expands our hardware partner strategy to include anyone who owns a 3D printer. It allows existing and future Tinkerine customers to sign up

and make a profile that will quickly integrate with any 3D printer hardware of their choice while maintaining the easy-to-use philosophy Tinkerine has emphasized in its Tinkerine Cloud.

“Expanding the ability for our customers to integrate their hardware into the Tinkerine Cloud ecosystem is important to ensure we are building products that fit the needs of our customers.” stated Eugene Suyu, Co-founder and CEO of Tinkerine. “The ever-expanding landscape of 3D printers means staying flexible while providing a powerful and simple tool. It’s important that we expand our customers technical expertise while providing a platform that streamlines 3D printing workflows.”

## **About Tinkerine**

Our mission is to provide a foundational understanding about Applied Design driven by 3D printing. Our ecosystem of 3D printing products and educational resources equips future generations with the innovative tools and products to stay ahead in a fast-paced, tech-driven world. Tinkerine enables the curious to convert creative ideas into the tangible and the unimaginable. All Tinkerine 3D printers and education services are designed and manufactured in Canada.
